## Restaurant and bar in Vila Nova de Gaia

The iconic location in the city of Vila Nova de Gaia, with a view over the Port that leaves us breathless. A space to enjoy and appreciate the built landscape. A simple program, a small bar with a pantry and a sanitary installation.

Two blades, supported by the glass, surround the interior space. The idea was not to touch the landscape and emotionally let the history of the place be the protagonist.

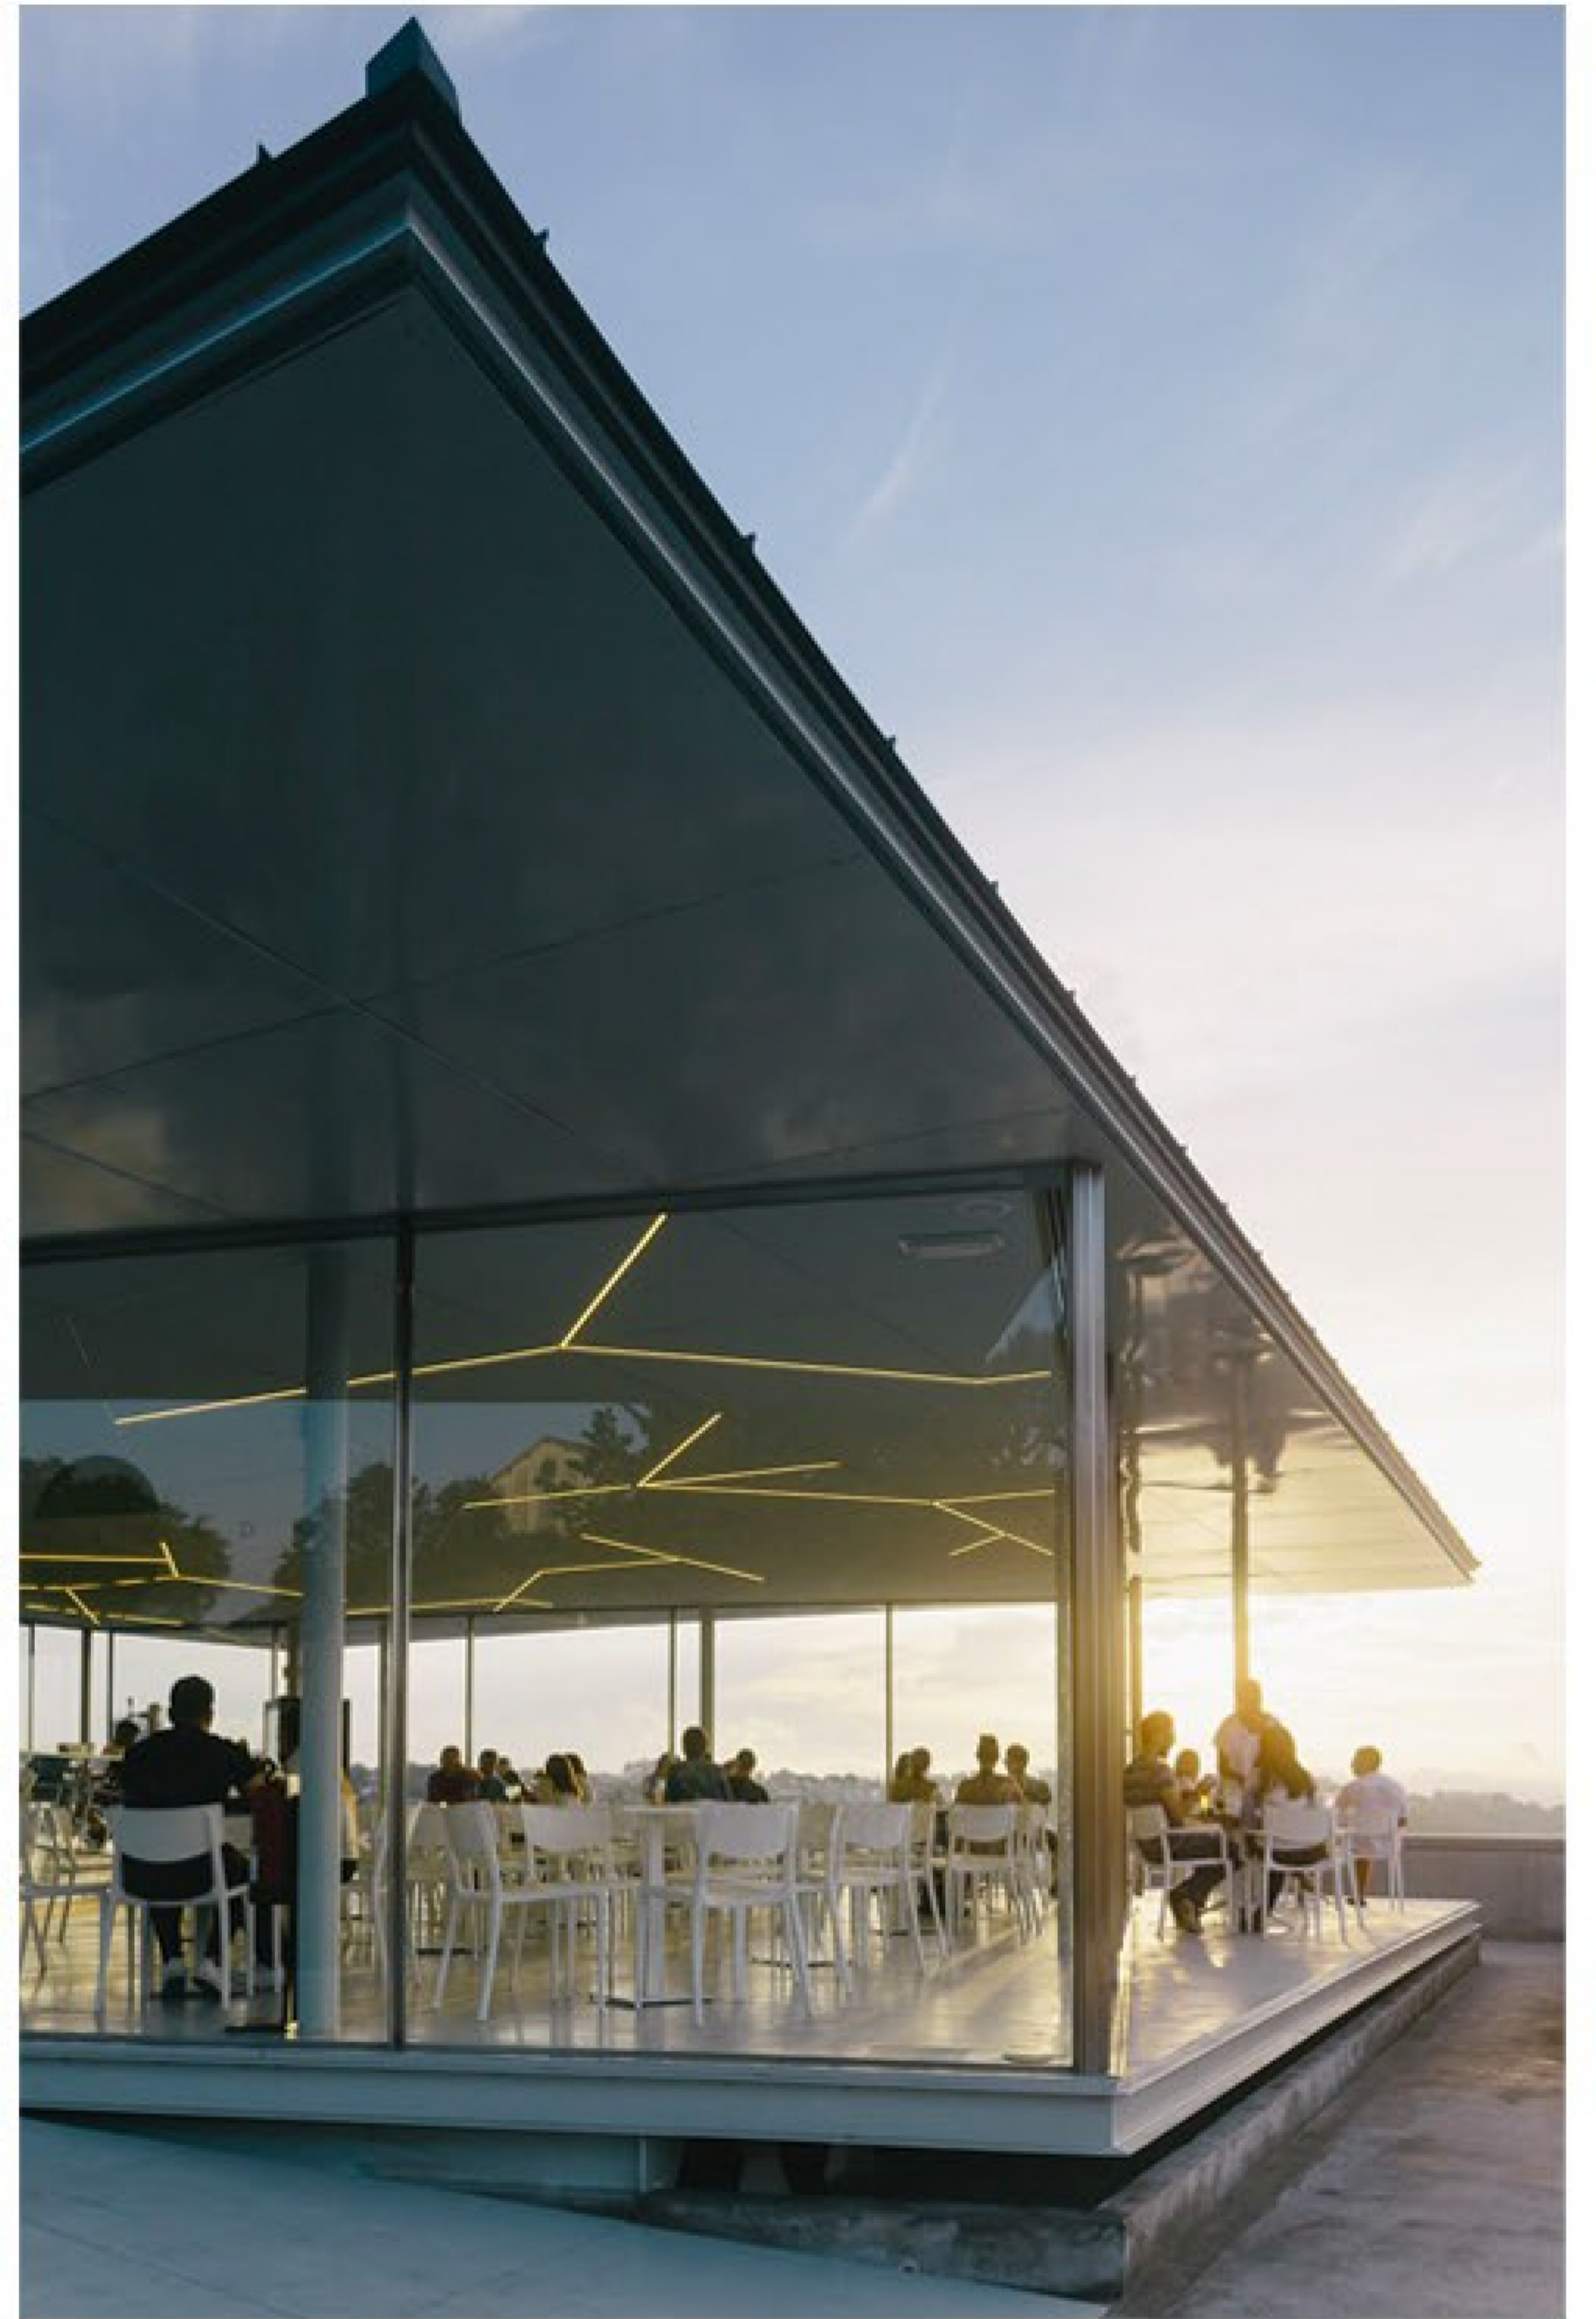

In the indoors, we can observe mirrors that reflect the surroundings, leaving, once again, the built environment in its mental reflections of the human being and the material applied.

Every architectural object is designed so that integration is paramount. Integration in the mental image created and integration in the value of the place.

At night the object is seen in the distance as a blade of light, enhancing the place's context.

Iron, Zinc, Glass and Mirror are the materials used in a simple and conscious way for the contemplation of a special place with an environment of worldwide splendour.

Year	Location
2014	Vila Nova de Gaia, Portugal
Category	Status
Architecture and Conceptual Design/ Interior Design	Built
